

# SÉCURITÉ PROCEDURE - DSC

**A Sécurité call is used to transmit a message containing important navigational or meteorological warnings.**

Most of the time this call will be made by the coastguard, however, they can be transmitted by any station.

If there is time it may be better to pass your message to the local coastguard and let them transmit a Sécurité call as they have better coverage.

## **What you must do:**

- Send an **All Ships - Safety Alert**
- Wait for 15 seconds

Speaking SLOWLY and CLEARLY into the microphone say:

Sécurité, Sécurité, Sécurité,  
All Stations, All Stations, All Stations  
This is..... (repeated 3 times)  
..... (message)  
..... (time - optional)  
Out

Release the transmit button.
